About This Content

Air Hauler 2 puts you in complete control of your own freight and passenger company - take charge of operations both in the boardroom and in the cockpit. You can also 'go global' and create your own Virtual Airline and recruit other AH2 pilots to fly for you with attractive pay-outs, or you can join another pilot's booming airline and fly for that alongside your own company.

The limitless possibilities and flexibility of Air Hauler 2 will let you immerse yourself totally in every operational detail of your company - each crucial flight will have an effect on the reputation and reach of your expanding empire.

The level of complexity is up to you - simply fly jobs between bases and buy or lease aircraft, or carve out a career in the air freight or airline industry by hiring AI pilots and risking everything on loans to fill up your dream hangar.

Air Hauler 2 tracks all your financial activity, whether you're buying aircraft or air bases, fuel or repairs, or paying for landing fees or even loans and leases. Take out insurance if you think the part-time pilots you've hired might let you down when you can least afford it.

As the pilot charged with delivering the goods or passengers on time, you can decide to fly a job in multiple legs, or stop anywhere en route for refuelling or maintenance. Create your regular passenger routes and look out for special humanitarian missions. Contend with real-world weather conditions if you want the extra challenge and keep a watchful eye on your fuel economy - the price of fuel in Air Hauler 2 can vary with the real-world price of aviation fuel for added realism!

Trade commodities for delivery on your cargo routes, and open manufacturing plants and factories at your bases to create parts for manufacture into more precious commodities. Travel around the world to meet new contacts and fly missions for them

individually to boost your company's reputation and income!

If your management skills are needed in the boardroom, recruit other pilots to fly jobs for you and keep track of them all with the AI pilot system. Detailed Map views showing all the airports in Flight Simulator will help you keep tabs on available jobs and the locations of your bases and fleet, and you can also view the live locations of other online Air Hauler 2 pilots.

Expand your company into an online Virtual Airline where other pilots can fly passenger routes and cargo jobs for your new venture – select jobs from a global shared job board and allow users to help you manage your virtual airline and fly, expand and maintain your fleet!

Air Hauler 2 puts you in charge every step of the way - from landings to leases, flight plans to finances, and repairs to recruitment!

Features

- In-flight menu system – manage your company and accept jobs without leaving your host simulator.
- Cargo jobs – more variety, better paid jobs, and much, much faster generation than in Air Hauler.
- Passenger operations – fly single passenger jobs between any airport you choose, or set up a schedule and routes for your airline to fly. You can let your AI pilots fly these routes or you can fly any of them at any time.
- Missions - take missions from new contacts you meet as you travel to new airports and destinations.
- Virtual Airlines – create your own Virtual Airline and recruit other AH2 pilots from around the world to fly passenger and cargo jobs! Advertise your airline on the Air Hauler 2 Hiring Bulletin Board. Accept and fly jobs from the Global Job Board and compete with other airlines for the best hauls.
- Humanitarian missions - respond to real-world disasters by manufacturing and delivering relief supplies to local airports.
- New AI pilot skills tree system – AI pilots can now be 'trained' in over 18 different skills which bring benefits to your company. As the AI pilots improve, they 'level up' in rank which gives them more skill points to spend. There is a skill tree which has five different tracks with individual skills in each and these can be unlocked by spending points. So, for example, an AI pilot who has five points in 'Bungee Warrior' will be subject to less in-flight cargo damage as a result of rough handling than one who has less (or no) points in that skill. Other examples are 'Rocketman', which provides a more efficient cruise (lower fuel costs), and 'Short Stripper' which lowers the runway landing requirements for AI pilots.
- Take missions from clients at airports – supply them with rare commodities or perform photo recon flights or private charter flights.
- Commodity trading – buy and sell commodities rather than just move them for clients. Make your own fortune trading between airports!
- Upgrade your bases – upgrade them with fuel depots and commodity storage facilities, allowing you to hedge fuel prices and store commodities long term.
- Factories and production – build factories at your bases and use them to produce desirable commodities which can't be bought on the open market.
- See full airport charts in Air Hauler 2 itself – charts are provided with the kind permission of John Allard.
- Find aircraft parts from vendors – find these at larger airports and use them to repair your fleet or build new aircraft yourself rather than buying them!
- New type rating system – get qualified on aircraft before you or your AI pilots can fly them.

-
- Buy and fly aircraft in your personal fleet – you can also transfer money from your company into your own personal account.
 - Buy new aircraft direct from the manufacturer, or buy second hand – have the aircraft shipped to you or go and collect them yourself and fly them home.
 - All-new Map views with great circle routes – several map tile choices are available.
 - Create ‘custom airports’ – create an airport which will be recognised in Air Hauler 2 for any scenery which doesn’t create a ‘proper’ airport in Flight Simulator (i.e. the Orbx series and other airport add-ons).
 - Included database of common aircraft – designed to populate the stats while importing – no more searching for fuel burn figures!

Title: FSX Steam Edition: Air Hauler 2 Add-On

Mission Details

Client: Alex Cuf (Wary)

Counter: I need someone to get 11366 lbs of Medicines from ENOT to ENCC (1576 NM) within 238 minutes of Take Off

Departure Information: ENOT - Wary RL, Africa

Destination: ENOT R, ASL
 Longitude: 14.0230, 08.1687, 22.75
 Landing Fees: 294.00 / £128.00 / £376.00
 (2001 USD: 68.15, 3474 USD: 68.15)

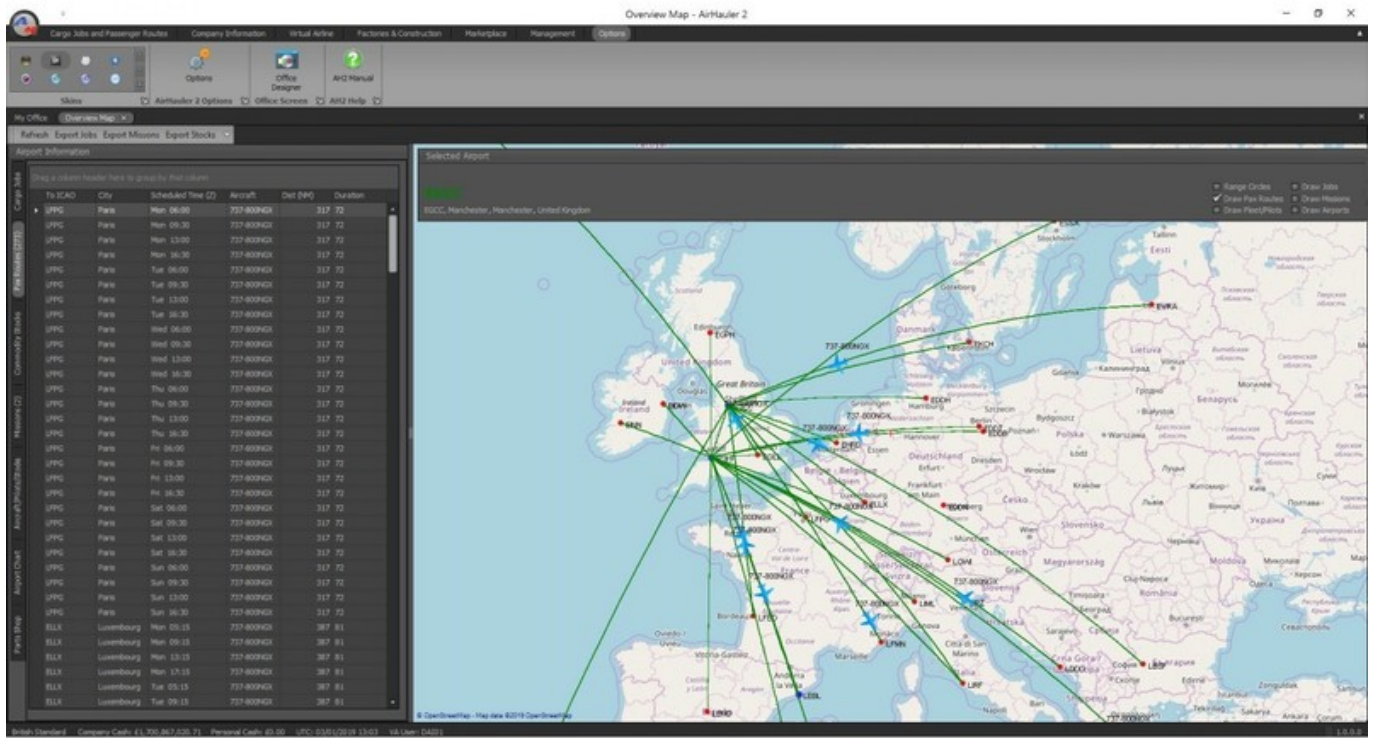

Runways:

Runy 07 (25)	1,228 m / 4,028 ft	Gravel
Runy 25 (07)	1,228 m / 4,028 ft	Gravel

Expires In:
10:46:20:00
Job Fee:
£126,488.00

Everyone, I have dealing with Steam Support on the issues everyone has mentioned. I have explained our situations to them and their response was that I have to just play the game more to unlock the DLC. Clearly their support staff doesn't know how the FSX sim works. So at this point I believe that they will not provided us with adequate help on this issue. I personally will be requesting a refund and attempting to purchase this through Just Flight themselves and would recommend the same course of action unless steam agrees to develop a fix or requests a fix from Just Flight.. I was a bit hesitant getting this one after reading the other reviews and my own concerns about fps hit, install woes and so on. Install is pretty straight forward. After Steam downloads it, you just need to (install V add) it through tools and Bobs your uncle. No noticeable FPS hit, or bugs for me . Great with a fully editable Aircraft list so you can include your selected hangar favourites. Started off in Career mode for the challenge and glad I bought this one. The icing on the old FSX cake is done.

Might need some more of that pitot heat.... How do I open the game? There seems to be no way to actually run this.... Or no documentation to tell us how.... am having the same problems with installing as the the other reviews have pointed out and would like to see it fixed. I can't find a way to make it work.

Was excited to see this on the Steam along with FXS, unfortunately, I am sad to say that this add-on is not playable:

1. Crashing FSX client when attempting to fly a run (silent crash), requires restart of the computer
2. Plane is never positioned where it supposed to be
3. Hard time finding a way to run this addon
4. requires update of FSUIPC4

Overall I would wait for the update for the developers, or buy it directly from them.

. How do I open the game? Is an installation necessary after downloading on steam app?. With the updated instructions, I'm glad to report that this version of AH2 is now working. It's an easier install than the non-Steam version once you remember where the Steam "Tools" menu is located. (It's a drop-down located under "Library.") Also, to launch it, you can just access you installed games window ("Library" drop-down, then "Installed," scroll down to "Tools" group.) No need to create a desktop icon, etc.. do not buy as the steam version of AH2 does not work yet as there is no .exc and will not show up in game. For those who are having difficulties with starting AH2, it is in your Steam tools menu, not your games menu.

There's been a few small noticeable bugs since I've tested it out, but they seem to do more with how FSX is handled. Otherwise, it works great and adds a bit more depth to FSX. Still have yet to test out the a lot of the features, but I can't wait to do so.
